SDG 17: PARTNERSHIPS FOR THE GOALS

### 17.4.2 Education for the SDGs

Trident Academy of Technology is deeply committed to **sustainable teaching** by incorporating sustainability principles into its curriculum and fostering environmental awareness among students. The institution integrates the **Sustainable Development Goals (SDGs)** into various courses, ensuring that students understand their role in addressing global challenges. Through hands-on learning, research projects, and practical exposure, Trident equips students with the knowledge and skills needed to contribute to sustainability in their respective fields. The college also organizes seminars, workshops, and awareness campaigns focused on sustainability issues, further reinforcing its commitment to shaping responsible and eco-conscious leaders for the future.

Sustainability And Climate Research Economics Department (SACRED) is a department under the Trident Center for Sustainability Research (TCSR) which has other sustainability start-ups like Decarb Climate Action Research LLP and WWS Energy LLP as associated sustainability units.

We at SACRED, focus to develop innovative, practical and equitable solutions to the challenges posed by carbonised climate change and environmental harms. Our the department is inter-disciplinary as it is a dynamic conglomeration of our faculties from diversified departments with their unique domain expertise. We all joined hands for capacity building and value addition to our Institution through innovations that would help our students and stakeholders to realize their roles and responsibilities for solving climate crisis and create a learning ecosystem to evolve a systemic approach enabling the world population to align with nature to coexist and save the planet for the future generation.

We dwell upon developing an understanding of Science and Innovation for the Sustainable Development Goals adopted by the world governments at Paris in 2015 and we advocate the principles of ESG business investing (<https://www.investopedia.com/terms/e/environmental-social-and-governance-esg-criteria.asp>)

The 2030 milestone in the Agenda for Sustainable Development, adopted by all United Nations Member States, provides a shared blueprint for peace and prosperity for people and the planet, now and into the future. At its heart are the 17 Sustainable Development Goals (SDGs), (<https://sdgs.un.org/goals>) which are an urgent call for action by all countries - developed and developing - in a global partnership.

Considering the 17 Sustainable Development Goals(SDG) defined by the United Nations towards an urgent concern for transforming the world economy and technological processes to move towards sustainable reorientation and achieving net zero (<https://www.un.org/en/climatechange/net-zero-coalition>), we have adopted 6(Six) of them (Goals No.4 to 7, 13 and 17) in our institution.

- Goal 4. Ensure inclusive and equitable quality education
- Goal 5. Achieve gender equality
- Goal 6. Ensure availability and sustainable management of water and sanitation for all
- Goal 7. Ensure access to affordable, reliable, carbon free, renewable, sustainable and modern energy for all
- Goal 13. Climate Action
