### **SDG 17: PARTNERSHIP TO ACHIEVE THE GOAL**

Trident Academy of Technology has pioneered a ground-breaking approach to teaching sustainability literacy through its own customized Sulitest, named "Eco-Sathi." This innovative questionnaire was designed to comprehensively assess sustainability literacy within the academy community.

Three distinct sets of questions were developed to evaluate Knowledge, Attitude, and Behavior concerning sustainability practices. To ensure that the questionnaire was robust and relevant, seven faculty members critically evaluated its construct and content validity, incorporating iterative improvements based on their feedback.

During the 2022–2023 academic year, the questionnaire was distributed via Google Forms to both staff and students, achieving significant participation with approximately 200 responses from each group. The Eco-Sathi initiative demonstrated widespread engagement, reflecting the commitment of Trident Academy of Technology to sustainability principles. This unique approach not only highlights Trident's dedication to sustainability education but also underscores its proactive role in fostering a culture of environmental stewardship and responsibility among its stakeholders.
