13. Climate Action

13.3.3 participate in co-operative planning for climate change disasters

Memorandum of Understanding (MoU) designed to strengthen efforts in climate change adaptation and disaster management. This collaboration is centered on advancing research, training, and knowledge exchange to build greater resilience against the growing impacts of climate-related disasters.

Through this initiative, Trident aims to integrate climate risk assessment, forecasting tools, and early warning systems into its academic and outreach activities. The partnership offers students and faculty opportunities to engage in practical learning experiences that enhance their understanding of environmental challenges and sustainable response strategies. By fostering this collaboration, Trident Academy of Technology reaffirms its commitment to promoting climate action, supporting sustainable development goals, and preparing future professionals to lead in a world increasingly shaped by environmental uncertainties.
