13. Climate Action

13.3.5 Commitment to carbon neutral university

In a significant move towards India's vision of achieving net zero emissions by 2070. As a independent non profit organisation National Carbon Management Association is running this program based on ISO 14064 protocol, aims to establish a demonstrable model through a real-world example of achieving carbon neutrality.

Trident Academy of Technology has established an ambitious target to achieve carbon neutrality by the year 2028, reaffirming its dedication to environmental sustainability and proactive climate action. This initiative reflects the institution's vision to integrate responsible energy management and sustainable practices across all aspects of campus operations.

To maintain transparency and credibility in its journey toward carbon neutrality, Trident is engaging with leading consulting firms—KPMG, PwC, and Deloitte—to undertake certification of its carbon-neutral status. These collaborations will play a vital role in evaluating the institution's carbon footprint, identifying effective reduction strategies, and monitoring measurable progress toward emission neutrality.

Through this forward-looking initiative, Trident Academy of Technology aspires to set a benchmark for sustainability in the higher education sector. By aligning institutional goals with global climate priorities, the academy seeks to not only minimize its environmental impact but also serve as a model for academic institutions striving to achieve sustainable, low-carbon operations.
