SDG11: SUSTAINABLE CITIES & COMMUNITIES

11.2 Support of arts and heritage

11.2.1 Public access to buildings

Trident Academy of Technology ensures public access to its campus facilities by actively engaging with the local community through various educational and recreational activities. The institution regularly opens its premises for hosting yoga sessions, chess competitions, and quiz events for nearby schools and community groups. By providing access to its classrooms, auditoriums, and sports halls, Trident fosters community participation, promotes physical and mental well-being, and encourages intellectual development among youth. This inclusive approach reflects the college's commitment to social responsibility and community development. Through these efforts, TAT ensures that students receive a well-rounded education that values both technical skills and cultural heritage, fostering a deeper appreciation of arts and tradition.

Trident Academy of Technology (TAT), while primarily focused on engineering and technology, actively supports arts and heritage through various initiatives. The institution hosts cultural festivals and events that highlight traditional and contemporary art forms, giving students a platform to explore and express their cultural heritage through performances in music, dance, and drama.

Student-run clubs at TAT foster creativity, offering outlets for fine arts, music, and theater. The academy also organizes workshops with artists to educate students on both traditional and modern art forms, bridging the gap between heritage and innovation
