SDG11: SUSTAINABLE CITIES & COMMUNITIES

11.2.2 Does your HEI provide public access to libraries including books and publications?

Public access to institute is essential for promoting equal educational opportunities and supporting social and economic growth. At Trident Academy of Technology (TAT), we are committed to inclusivity, democratizing knowledge, and reducing socio-economic barriers. To support this mission, TAT has developed and implemented policies that provide public access to our library, aligning with the institution's forward-thinking vision. A dedicated Library Committee oversees the library's efficient operation, continuously bringing innovative ideas to enhance its offerings.

The college has a central library with all modern facilities. The library has 60000 book volumes, 274 e-journals, 275 science direct and 25 IEEE articles. The library also provides e-learning facility, digital library, reading room and reference section. All the library operations have been computerized. Computerized Library Management includes search, indexing, issue/return records. Bar-coding of records are common and all book volumes are managed through bar-code readers. An in-house developed Library Management Package manages the indexing, issue and return records of books and journals. The library services of the institution are managed through the college intranet e-governance. Through intranet the students and faculties can access digital resources from institution library server. A scaling-up of the services to be accessed through internet is on in full-swing.
