SDG11: SUSTAINABLE CITIES & COMMUNITIES

11.2.6 Record and preserve cultural heritage

Trident Academy of Technology (TAT) is deeply committed to recording, preserving, and promoting cultural heritage, recognizing the vital importance of safeguarding traditions and history for future generations. The institution actively supports initiatives that document and celebrate regional and national heritage through collaborations with local artisans, historians, and cultural organizations. Students are encouraged to engage in projects exploring traditional crafts, art forms, and historical landmarks, gaining practical experience in cultural documentation and preservation. The academy regularly organizes heritage walks, exhibitions, and seminars to raise awareness of the value of cultural legacy while integrating modern technology to develop innovative solutions that enhance accessibility and conservation. Additionally, TAT's library serves as a repository of cultural resources, housing books, digital archives, and historical records that serve both educational and preservation purposes. Through these collective efforts, TAT bridges technology with tradition, fostering a meaningful connection between innovation and cultural heritage in the modern era.
