

## Projects to Startups

### Incubated at STPI (2024–25)

**Biocurae Aquatecx** is a startup focused on **cleaning ponds by removing algae and tackling plastic waste**. They are incubated at the Software Technology Parks of India (STPI), Bhubaneswar, and have received initial funding of INR 2 Lakhs. Their innovative solutions aim to promote environmental sustainability by restoring aquatic ecosystems and reducing plastic pollution.

**Aqua Vitea**, incubated at the Software Technology Parks of India (STPI), Bhubaneswar, focuses on **real-time water quality testing for aquatic ponds**. They have received an initial funding of INR 2 Lakhs to support their innovative solutions for maintaining healthy marine ecosystems.
